

**IN THE SPECIFICATION:**

*Please replace paragraph no. [0025] with the following paragraph. The amendments to paragraph no. [0025] are indicated by strikethrough and underlining.*

[0025] Events associated with posting of a message can correspond to conditions associated with posting of a request message or a notification message by a message sender, such as, for example, posting errors due to invalid message headers, message size violations, and so forth. Events associated with routing of a message can correspond to conditions associated with routing of a request message or a notification message to a message recipient, such as, for example, routing errors due to permissions violations, policy enforcement, validity of the message recipient, and so forth. Events associated with delivery of a message can correspond to conditions associated with delivery of a ~~response~~request message or a notification message to a message recipient, such as, for example, delivery errors due to failure to connect to the message recipient, security violations, and message expiration. Events associated with response to a delivered message can correspond to, for example, a timeout error where the message recipient fails to respond to a request message within a particular time interval or a message error where the message recipient sends a response message indicating a processing error.
